

Announcing... **The Allscripts Legislative & Regulatory Advocacy Center**

www.allscripts.com/advocacy

What is it?

As part of our commitment to shape, drive and increase the volume of legislation that is good for our clients, our prospects, and Allscripts, we have added an amazing new capability to our website called The Allscripts Advocacy Center (www.allscripts.com/advocacy). This new tool helps inform providers about the important issues that Congress is working on. Plus, it enables providers to directly engage with elected officials through auto-generated emails that can be sent in a matter of seconds.

What issues are critical?

Right now, there are two important topics queued up in the Allscripts Advocacy Center that our clients have told us are important:

- The scheduled 21% reduction in the Medicare physician fee schedule
- The definition of "hospital-based physician" under the Meaningful Use Proposed Rule related to the HITECH incentive program

The Advocacy Center is thus ready to go with a letter on each subject and assignments to the right targets - we've made the process too simple for them not to do it!
